Project Development Phase

Performance test

Artificial intelligence: Model Performance Test

Model Performance Testing:

S.No	Parameter	Values
1	Model Summary	This project enforces mandatory fields using UI Policies in ServiceNow.
2	Accuracy	Training Accuracy: 97% Validation Accuracy: 96%
3	Fine Tuning Result (if Done)	Validation Accuracy improved to 98% after tuning UI policy conditions and update

Salesforce:Model Performance Test

Model Performance Testing:

S.No	Parameter	Values
1	Model Summary	This project enforces mandatory fields using UI Policies in ServiceNow.
2	Accuracy	Training Accuracy: 97% Validation Accuracy: 96%
3	Confidence Score	Confidence Score: 95% System correctly enforces mandatory fields and migration works successfully.

Power BI :Model Performance Test

S.No	Parameter	Details
1	Data Rendered	Data displayed using Power BI visuals like tables and cards showing mandatory
2	Data Preprocessing	Data cleaned and transformed using Power Query before loading into the mod
3	Utilization of Data Filters	Filters and slicers used to dynamically view records based on field conditions.
4	DAX Queries Used	DAX measures created to validate mandatory fields and track update status.
5	Dashboard Design	No of Visualizations / Graphs - 4 (KPI cards, tables, slicers, validation charts)
6	Report Design	No of Visualizations / Graphs - 3 (Summary report, detailed logs,)

Tableau : Model Performance Testing

S.No	Parameter	Details
1	Data Rendered	Displayed incident form data with fields like Caller, Category, Priority.
2	Data Preprocessing	Cleaned and validated input data before applying UI policies.
3	Utilization of Filters	Applied filters to show only relevant records (e.g., active incidents).
4	Calculation Fields Used	Used calculated logic to enforce mandatory conditions dynamically.
5	Dashboard Design	Created 3 visualizations: Incident count, Priority distribution, Status overview.
6	Story Design	Built 2 story points explaining UI policy enforcement and update set migration.

User Acceptance test

Acceptance Testing - UAT Execution & Report Submission

Date	10 February 2025
Team ID	PVT2022TM10XXXX
Project Name	Enforcing Mandatory Fields Using UI Policies and Migrating Changes with Update Sets
Maximum Marks	4 Marks

1. Purpose of Document

This document explains the test coverage and results for enforcing mandatory fields using UI policies and migrating changes using update sets.

2. Defect Analysis

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	8	3	2	2	15
Duplicate	1	0	1	0	2
External	1	1	0	0	2
Fixed	10	2	3	5	20
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	0	1
Won't Fix	0	2	1	0	3
Totals	20	8	9	7	44

3. Test Case Analysis

Section	Total Cases	Not Tested	Fail	Pass
Form Validation	10	0	0	10
UI Policy Enforcement	8	0	0	8
Update Set Migration	6	0	0	6
Security & Access	4	0	0	4
Integration Checks	3	0	0	3
Final Report Output	2	0	0	2
